Curriculum Vitae

Profile

My work experience over the past ten years is based in technology—from service to education to financial tech roles—but my long-term focus is on people, improving civic engagement and political transparency. Academically, I focused my research on media technology's role in conflict, primarily in the MENA and the Balkans. The underlying theme in my work is hinged upon one observation: the tools we use to disseminate information expose base commonalities in our motivations for conflict and peace.

Research Interests

- Relationships between technology, society, and conflict
- Role of media in conflict, particularly in:
 - Bosnia-Herzegovina
 - Middle East North Africa (MENA)
 - United States—particularly with regard to racial inequality

Papers

- [Never Again? The US Response to Genocide in Bosnia and Rwanda](#)
- [Building Fences: Saudi Arabia's Strategy for National Security](#)
- [Information Warfare: The Roles of Social Media in Conflict](#)
- [Se Va a Poner Feo: The Culture of Violence in Mexico and Its Impact on Development Efforts](#)
